REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-12 and 16-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "a mounting member having a principal surface, said mounting member entirely made of glass and having a core and a cladding formed therein, said cladding having its surface to form said principal surface in whole" as set forth in the claimed combination. Claims 2 and 3 are also allowable based upon their dependence on claim 1.

Claim 4 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "an optical waveguide entirely made of glass, having a core and a cladding formed therein and having a principal surface, with said optical element mounted on said principal surface, for guiding light emitted from said optical element or light admitted to said optical element, said cladding having its surface to form said principal surface in whole" as set forth in the claimed combination. Claims 5-12 and 16 are also allowable based upon their dependence on claim 4.

Claims 17 and 18 are allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "a mounting member having a principal surface, said mounting member entirely made of glass and having a core and a cladding formed therein, said cladding having its surface to form said principal surface in whole" as set forth in the claimed combination.

The prior art of record, Forrest et al and Hayashi teach an optical module comprising a mounting member having a principal surface, an interconnect formed on the mounting member, an optical element mounted on the principal surface and connected to the interconnect and a semiconductor element driving said optical element, said semiconductor element mounted on said principal surface and wherein said mounting member is an optical waveguide. However, neither Forrest nor Hayashi teach that the mounting member is the waveguide itself having a core and a cladding formed therein and wherein the cladding forms the principal surface in whole and there is no motivation or teaching to modify this difference as derived. Forrest et al and Hayashi teach a mounting member which is a block with an optical fiber mounted in V-shaped grooves in the block.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alessandro V. Amari whose telephone number is (571) 272-2306. The examiner can normally be reached on Monday-Friday 8:00 AM to 5:30 PM.
